**Title:** Certification Extension – NAS410 Revision 4 amendment

**Reason:** Communication of Requirements

**SME / Contact:** David Cohn

This tip sheet may be distributed to suppliers.

AIA NAS410 committee released an amendment to revision 4 of NAS410. The supplement addresses the requirements for extending NDT personnel certifications, annual maintenance exams and vision examinations for this transitory period. This amendment is in effect until the effective revision 5 implementation date.

The amendment allows employers affected by the Covid-19 pandemic a one time 90 day extension. Each extension must be documented separately with the justification, new expiration date and the Responsible Level 3's approval.

Please work with your suppliers to assure the extension process is properly applied, if needed, during this transitory period.

Copies of AIA NAS410 Revision 4, Addendum are available as follows.
